

Clark Forklift

Clark Forklift Forklift Training - At present, there are over 350,000 Clark forklifts performing globally, and in excess of 250,000 in service in North America alone. With five major lines across the world, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift has 20 exclusive models of lift trucks, with parts covering more than 120,000 specialized components for all of its automated equipment. Your regional Clark Supplier is your complete source for availability of all your parts requirements supplied by Clark Totalift.

Clark features a phenomenal Parts Distribution team. The items warehouses are conveniently situated in Changwon, South Korea and Louisville, Kentucky to make certain exceptional service to both their buyers and their sellers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing companies. Motivated to supply the highest level of value and service to our clients, Clark remains on the cutting edge when it comes to enhancing efficiency and benefiting performance.

Internationally, Clark has one of the most impressive dealer support networks. With over 550 locations worldwide, supplier representation in over 80 nations and 230 locations in North America, their high level of commitment to their consumers predominates the material handling industry.

Clark proudly remains an innovative leader of the industrial equipment industry, revolutionizing protection features such as the worker restraint system. This exceptional dedication to safety is currently a standard feature on every lift truck.

Clark has a continual objective to possess the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be globally certified with quality standard ISO 9001 in all of its production plants. Furthermore, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any number of environmental limitations, thus placing them in a prevailing market position.

Resource Efficient Manufacturing

Clark has selected the system of "Lean Production" at all of its assembly facilities because this method is extremely economical and allows for minimal use of resources. Established to guarantee maximum proficiency, this system is intended to discover and acknowledge the most effective ways for manufacturing plant stewardship. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

Engine Design

Clark's product engineers and suppliers join together to enhance the proficiency and excellence of their products while minimizing costs. The contemporary value engineering program combines progressive product development and delivers improved consumer support and service within the industry.
