

Kitchener Manlift Operator Certification

Kitchener Manlift Operator Certification - Our scissor platform and aerial lift training and certification empowers participants with a knowledge and general understanding of the efficient and safe use of "Power Operated Mobile Work Platforms," under all of the existing regulations in the industry. Upon successfully completing the training, those participating would be able to know and understand certain safety and health related hazards associated with utilizing scissor and aerial lifts.

There are various affiliated locations in your district offering Manlift Operator Certification Programs. Those training are provided with in-depth instruction on safe utilization and rules together with extensive hands-on training. The skill level and knowledge of each and every trainee is evaluated and people who are capable of demonstrating a satisfactory level of operational competence will be given employee documentation and Operator Certification cards.

Theory Training

The trainer guides those training through a comprehensive and interactive review during the theory training. The operator workbook is studied which covers all applicable regulations. Other topics like for example various machine kinds in addition to various sizes and associated applications, safe operating measures, pre-use checks and general work place safety are explored individually.

Theory Evaluation

The evaluation of the theory parts starts with a written exam, which focuses on the course concepts which was included in the reference instruction manual. Tests are graded and returned to the one training. After that the exams are reviewed to ensure understanding and a minimum score of 70% is considered necessary in order to pass this portion of the training.

Practical Training

The hands-on part of the course is included in the practical training. Here, trainees are shown the safe operating procedures, the parking and shutdown measures and the pre-use check measures. Each trainee has the chance to operate the equipment and practice the skills they learned throughout Theory Training under the helpful eye of the program trainer in an environment that is safety controlled.

Practical Evaluation

The assessment of the practical portion is where the trainee is assessed as to whether they have the minimum level of skill. Trainees are individually tested on their skills utilizing the machine in a somewhat difficult program environment. As soon as the assessment is done, the ones training are de-briefed and given the opportunity to deal with whatever issues they may have about any part of the course. Each and every employer of a successful trainee will be given the official records and documents immediately after the course has been finished.
